

## EnergyMate®

MARINA  
RV PARK  
BUSINESS  
HOME

**EnergyMate® is the simple and affordable solution for marinas, RV campgrounds and home.** Its compact size is ideal for any location and delivers power with a capacity of 120 amperes where you need it. Just like its big brother — PowerPort® — the EnergyMate® is built to last featuring PowerSnap® panel technology to save you time and money.

### PowerSnap® Panels

PowerSnap is an industry exclusive that allows you to change out receptacles and breakers just by snapping a panel in and out — saving time while allowing you to keep customers happy with little or no downtime. It's as easy as removing four screws, pulling the panel, sitting a new panel in place and reattaching. No more replacing a pedestal, rewiring on property or breaking the pedestal down for annual maintenance inspections like traditional pedestals. Most electrical parts are standard and can be bought locally; no special sized breakers, light bars, etc.

### HydroLocker and EnergyMate

Create a utility center with EnergyMate® and HydroLocker. By mounting EnergyMate® to the front of a HydroLocker, you can create a space-saving solution for your boat slip, power and storage all-in-one. Add even more value to your marina by adding your own weather utility in the HydroLocker's rear section — your customers will love it.

# EnergyMate®

## STANDARD FEATURES

- Non-conductive polycarbonate injection molded body with UV protection
- Prewired with standard copper wire to 200 ampere with provided non-metallic separation of high-voltage and low-voltage
- Field wiring terminals to 2 AWG wire

- CATV and Internet/ CAT5 connectors
- Custom logos available
- Metering for both electric and water utilities (water only with optional stand)

## CUSTOMERS RAVE ABOUT HYPOWER

"I am very pleased with my HyPower EnergyMate power panel. It has been under water during two hurricanes and a Nor'easter. When the storms passed everything came apart easily to clean and reassemble. Even the breakers worked!

— PHIL R.
