HyPower's **technology-leading power pedestals** are known as the **industry leader in dock lockers and other products** — from Japan to the Caribbean, Canada to South America. HyPower's commitment to on-time delivery, service and support is backed by 50 years of focusing on quality products and exceeding customer service expectations.

FLEXIBILITY

- **PowerSnap®** panels include breakers and receptacles all in one unit
- Easier and safer repairs
- Simple upgrades for more power — no need to rewire or replace a unit
- Save time and money with faster, easier annual maintenance inspections

DURABILITY

- No dents or scratches that rust with impact-resistant, non-conductive UV protected polycarbonate cases
- Wiring that exceeds industry requirements utilizing pneumatically secured connectors
- Brass inserts in all high-stress areas to prevent structural failures

DESIGN

- HyPower pedestals are 100 percent UL certified as well as ADA, NEC, NFPA and NEMA code compliant — ISO 9001 registered manufacturing
- Offers safer, more durable rounded corners on units
- Standard electrical that can normally be sourced locally
- Reduced exposed connectors — no visible full-length seams

CUSTOMERS RAVE ABOUT HYPOWER

“We have a 325-slip marina that had old metal power centers that were rusting away. After researching many different pedestals we chose HyPower. The Power Snap technology allows you to change panels to a variety of configurations yourself. It’s quite versatile, and we are very happy with it.”

— SCOTT S., PETERS LANDING MARINA, HUNTINGTON BEACH, CA

“We very happy we chose HyPower. The best thing to us is the ability to remove the tops of the pedestals in the event of a hurricane so that they don’t get damaged. They also work very well — with little to no problems since being installed. We would recommend them to anyone! In fact, I have already told other marina operators about HyPower pedestals.”

— MOLLY M., GREEN TURTLE YACHT CLUB, THE BAHAMAS

“The massive storm which struck Galveston Island in 2008 was devastating — with a surge equal to a Category-4 hurricane. Thanks to a wise decision to use PowerPort pedestals, we were able to detach the units and store them safely out of harm’s way. We are currently adding 58 new sites and plan to include PowerPort pedestals.”

— RON G., JAMAICA BEACH RV PARK, GALVESTON, TEXAS
